Specifications

NMR Food Imaging Analyzer (60 mm)

A benchtop NMR analyzer that measures whole food samples in a 60 mm bore, with the bore horizontal or vertical.

Buying it

Lead time	Made to order. Your quotation gives the lead time.
Price	Your quotation gives the price of the system and of its delivery, installation and training at your lab. The quoted price includes 12 months of Standard Care, the service plan that comes with every purchase.
Included	Your quotation lists the hardware, coils and software that come with the system.
Firm quotation	The final quotation your purchase order will cite. It confirms the price, the lead time and what comes with the system.
Country of origin	China. We import the system, then deliver and install it at your lab.

Technical specifications

Bore	60 mm
Configuration	Horizontal or vertical
Samples	Whole food products, measured without destroying them

What your lab provides

Your lab pays for any room alterations and electrical work.

Your firm quotation comes with a site checklist that gives the sizes, weights and room values.
